

DEPARTMENT OF HEALTH GOVERNMENT OF PUERTO RICO MEDICAID PROGRAM

Third Important Update 2025-PRMP-PRE-004

This notification has the purpose of informing interested vendors of the following updates and/or clarifications to this RFP:

1. Updated Attachment A– Cost Proposal. 4. Project Deliverable tab. Cell C45 contained a summation formula that omitted Cell C44, and Cell E45 was updated to remain blank. See Attachment A – Cost Proposal Amendment 2 for further information.
2. Vendors may use different font styles and sizes, outside of what is required in the RFP, for images and other graphics, as long as provided text remains legible both printed and digitally.
3. The cost proposal is designed to align with the approach of the selected vendor invoicing for completed work, as deliverable payment milestones are achieved. As deliverable payment milestones are completed, the vendor will be allowed to invoice for the full dollar amount associated with each payment milestone. For recurring deliverables, the vendor can invoice for those on monthly basis. The pricing for each deliverable should reflect the vendor's fully proposed costs.
4. PRMP has established a Modifications and Enhancements Pool (750 hours budgeted) that will be billed on a Time and Material (T&M) basis. The use of the Modifications and Enhancements Pool is exclusively at PRMP's discretion. When applicable, vendors will invoice for additional work using the labor rates submitted in Attachment A: Cost Proposal.
